

Aperio® Wireless Lock Technology

ASSA ABLOY
Opening Solutions

Experience a safer
and more open world

Qumulex

Qumulex QxControl and ASSA ABLOY Aperio-enabled locks give you the flexibility to expand your access control system to almost every opening in your facility.

Qumulex offers the flexibility to manage your access control and video from anywhere using the cloud, and now with Aperio you can manage more doors using wireless technology.

- Manage your access control and video surveillance anywhere using the cloud, or start with an on-premise solution that can move to the cloud when you are ready
- Easily connect your Aperio devices to the local QxControl Gateway and then manage them anywhere with a cloud subscription
- Scalable, open architecture solutions from Qumulex and ASSA ABLOY allow you to connect readers, integrated locks, cameras and supporting devices that you want, or use what is already installed to keep your facilities safe

Aperio is a global wireless solution, available in a range of lock types to support various types of openings as well as local requirements in regions throughout the world

Ideal for glass door applications

Aperio is a global wireless solution, available in a range of lock types to support various types of openings as well as local requirements in regions throughout the world

The ASSA ABLOY Group is the global leader in access solutions. Every day we help people feel safe, secure and experience a more open world.

ASSA ABLOY
Opening Solutions

Aperio® Wireless Lock Technology

Available in a variety of locking solutions from ASSA ABLOY Group brands, Aperio is a global wireless platform that allows you to increase security – quickly, easily, and affordably. It uses local wireless communication between an Aperio lock and hub to connect to an access control system, eliminating the greatest cost and inconvenience of traditional access control – the wiring at the door.

Aperio Features

- Utilizes IEEE 802.15.4 wireless communication between the lock and an Aperio hub that is connected to the electronic access control system
- Real-time communication to the access control system for greater security and control
- Real-time door status monitoring
- Advanced data security with standard encryption techniques
- AES 128-bit encryption
- Global wireless platform that addresses a wide range of security requirements
- ANSI/BHMA Grade 1 hardware, offering the highest degree of physical security available in access control locks

Qumulex QxControl Features

- Unified video and access control system providing both in a simple to use browser based interface
- Hybrid with flexible deployment options. All cloud, all on-premises or both
- Mobile first, a single application deployed via browser on any device using our progressive web app
- Open platform, works with leading door hardware, cameras, network switches, analytics and IoT devices
